### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory M. Reilly on December 9, 2009. The examiner contacted Mr. Reilly to indicate the application would be allowable if the subject matter of new claim 56 is incorporated into the independent claim 25. Mr. Reilly agreed to the examiner's amendment as well as other to place the application in condition for allowance.

The application has been amended as follows:

Claim 24 is cancelled.

Claim 56 is cancelled.

In claim 25, line 9, "wherein the carrier film layer has opposing faces of which one face bears the printed display layer, wherein a clear film layer of a polymer is glued over the printed display layer by a clear adhesive layer to protect the printed display layer, and wherein the other of the opposing faces of the carrier film layer bears the semi-permanent adhesive layer" Has been inserted after "adhesive layer."

In claim 57, line 1, "claim 56" has been changed to "claim 25."

In claim 58, line 1, "claim 56" has been changed to "claim 25."

In claim 59, line 1, "claim 56" has been changed to "claim 25."

In claim 60, line 1, "claim 56" has been changed to "claim 25."

***Allowable Subject Matter***

2. Claims 25, 47-55, and 57-62 are allowed.
3. The following is an examiner's statement of reasons for allowance: The claims recite a method of converting a surface top into a promotional medium in a commercial eating and/or drinking establishment in which the surface top is used by customers, said method comprising:

providing a surface top covering having a carrier film layer bearing a printed area forming a printed display layer constituting the promotional medium, a semi-permanent adhesive layer and a layer of release paper covering the semi-permanent adhesive layer, wherein the carrier film layer has opposing faces of which one face bears the printed display layer, wherein a clear film layer of a polymer is glued over the printed display layer by a clear adhesive layer to protect the printed display layer, and wherein the other of the opposing faces of the carrier film layer bears the semi-permanent adhesive layer,

removing the layer of release paper and applying the surface top covering to the surface top by contacting the semi-permanent adhesive layer with the surface top to grip the surface top securely while the surface top covering is in use by the customers, while not allowing the covering to be removed readily or damaged by the customers and yet allowing complete removal of the surface top covering after a specified length of time,

completely removing the surface top covering with the carrier film layer, printed display layer and semi-permanent adhesive layer from the surface top after said specified length of time, and

either leaving the surface top without a replacement surface top covering or replacing the removed surface top covering after said specified length of time by applying another surface top covering having the carrier film layer, printed display layer constituting the promotional medium and semi-permanent adhesive layer, to the surface top by removing the release paper layer of the another surface top covering and contacting the semi-permanent adhesive layer of the another surface top covering with the surface top. Buoniconti et al discloses a method of applying a polycarbonate film to countertops. The method includes thoroughly cleans the counter surface to remove any dirt, dust or other contaminates, providing polycarbonate sheet or film with a lower surface bearing a coating of pressure sensitive adhesive covered by a removable peel-way backing paper or release liner (Col 2, lines 1-24), wherein the film or sheet is a clear film and can be printed on the protected second surface with infinite variety of colors or message to be displayed (Col 3, lines 3-5), which can includes advertising (Col 3, lines 30-33) with a strong adhesive, which resist peel-up unless deliberate, strong forces is used and when a replacement is needed, the film is peel away and any remaining adhesive can be removed using a wood chisel (Col 3, lines 24-29). The film is applied to countertop by peeling the release paper to expose the adhesive and pressing and adhering the film to one edge of the countertop (Col 2, lines 29-38). Since Buoniconti et al discloses the second surface with the adhesive is printed instead of

printing on the first surface and then covered with a clear film layer, therefore, Buoniconti et al teach away from printing on the first surface and gluing a clear film layer onto the printing and providing the semi-permanent adhesive layer on the second surface. A search of prior art of record did not disclose reference or references in combination with recited feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
